How to Revise for GCSE

Become the ultimate revision machine with CGP!

At CGP, we're revision experts. We even built a robot that just did revision 24 hours a day, but it went a bit haywire and blew up our coffee machine. We had to take its batteries out.

That taught us not to mess with robots, but we can still turn you into a 100% efficient GCSE revision device. That's why we've made this book — it's packed with failsafe CGP study techniques that'll make sure you've really learned everything you need for the exams.

And with ultra-helpful checklists, timetables and planners included, you can cruise calmly through your revision without any unfortunate explosions. Unlike poor old Revise-O-Tron...

Know why you are Revising!

Using page 2 of the planner, read through the page on Motivation and Procrastination.

Plan your Treats! Put them onto your revision timetable. List them and put them somewhere you can see them!
